

*Quantitative Finance* encourages contributions from practitioners, academics in finance or economics, and scientists from other disciplines. The journal covers such applications as:

Agent-based modelling; Anomalies in prices; Asset-liability modelling; Behavioural finance; Corporate finance; Corporate valuation; Derivatives pricing and hedging; Evolutionary game theory; Experimental finance; Extreme risks and insurance; Financial econometrics; Financial engineering; Learning and adaptation; Liquidity modelling; Market dynamics and prediction; Market microstructure; Operational risk modelling; Portfolio management; Price formation; Risk management; Trading systems; Web-based financial services.

All *Research Papers* should be submitted online at *Quantitative Finance*'s Manuscript Central site at the address below to facilitate rapid accessibility of your work to our readers:

<http://mc.manuscriptcentral.com/rquf>

In addition, *Quantitative Finance* welcomes short pieces from academics or practitioners working in the field for publication in the journal's *Comment & Analysis* section. The frontiers of finance are shifting rapidly and to keep pace with that change the *Comment & Analysis* section publishes short pieces such as:

- ⌚ Letters to the Editor - brief communications that are both timely and important enough to merit rapid publication;
- ⌚ Analysis of recent developments in the field;
- ⌚ Profiles of individuals or institutions highlighting their recent innovations or contributions to the field;
- ⌚ Reviews of recent conferences or books;
- ⌚ Critical comment on papers previously published in the journal.

All pieces intended for the *Comment & Analysis* section should be no more than 3500 words in length. Contributors should note that, whilst *Comment & Analysis* pieces will receive a thorough editorial review, they will not all pass through the extensive blind peer review process reserved for lengthier *Research Papers* submitted to the journal.

*Comment & Analysis* submissions should also be submitted online at <http://mc.manuscriptcentral.com/rquf>
